DEERFIELD WOMAN WINS NORTH SHORE SENIOR CENTER DRAWING

NORTHFIELD –In January 2015, North Shore Senior Center sent out a survey via email to 6,000 older adults who are part of the Baby Boom generation. These people had no previous relationship to the Center; they had not taken our classes or participated in our programs. This survey was one of a series of tools NSSC has been using to learn more about what we can (and should) offer Baby Boomers in terms of our future programs and services.

All survey respondents were invited to enter a drawing for a FREE iPad Mini 2. We are pleased to announce that the winner was **Amy Tcath, of Deerfield, Illinois**. Amy was thrilled to be chosen as the winner and said that she might even return to NSSC's Technology Learning Center for tips on how to best use her new iPad Mini 2!

Research is telling us that the Baby Boomers are working longer than previous generations of seniors. However, many do plan to transition into part-time work or a less demanding job in the coming years. They are particularly interested in arts, theater, film, fine dining and travel. Fitness and good nutrition are key concerns as well.

As this group ages, North Shore Senior Center will provide programs specifically tailored to their needs. We invite you to become part of this discussion! What kinds of programs would you enjoy? Feel free to share your thoughts and suggestions with us via email: talk@nssc.org. To learn more about North Shore Senior Center and its services for older adults and their families, please call 847.784.6000 or visit us online at www.nssc.org.
